

Disclaimer

Permit # _____ issued on _____ is an “Authorization to Construct” a septic system only and is based on information supplied by myself and the registered Sanitarian or Professional Engineer I employed. **This information is to the best of my knowledge true and accurate.** I understand that a “Notice of Approval” for the septic system will **ONLY** be issued after all criteria set up by the Texas Commission on Environmental Quality (TCEQ) and Liberty County Environmental Health Services regarding onsite sewage facilities have been met. I understand that failure to comply with TCEQ or County rules regarding on-site sewage facilities will result in a non-issuance of the **“Notice of Approval.”**

EXISTING SYSTEMS: I understand that when upgrading or improving and “existing system,” all components of the existing system **MUST** be brought to current codes or standards. I understand that in order to identify the location where the tanks and field lines of an existing septic system are located, holes may be dug and/or probing in some manner may be conducted on my property. If water lines, gas lines, and any underground utilities are not property marked, they could be damaged during the court of inspection. However, Liberty County or its representatives will not be responsible for inadvertent damages that may be done.

NEW INSTALLED SYSTEM: I understand that an inspection by Liberty County Environmental Health Services must be completed and approval given prior to back-fill of any newly installed or add-on modifications to existing systems. **Inspections may be scheduled by contacting the Liberty County Permitting office no later than 3:00 p.m. on the business day prior to the needed inspection date.**

I hereby grant permission for the Liberty County Environmental Health Department personnel to enter upon the property described in the permit for the purpose of inspecting the septic system. I understand that the performance of the septic system will depend on many factors including correct sizing, maintenance, water usage, amount of rainfall received on the property, etc. and neither Liberty County or its employees or representatives will not be responsible for malfunctioning systems.
