

Liberty County Information Technology (IT)
Areas of Responsibility

Primary Technical Responsibilities

- Countywide Data Network (Voice over Data – VOIP)
 - Network Interface Devices – Firewalls, Routers, Switches
 - Servers – Liberty County is currently migrating to cloud based Processing, but until that is complete, current responsibilities Including Tape Backups and Vendor Interface will continue.
 - PC's and other Peripherals – Resolve any hardware or software issues that arise During daily operations, including Windows Operating Systems, Microsoft Office, and vendor data-base software.
 - Email – Liberty County currently uses (CIRA) County Information Resource Agency to host email services. You will be responsible for initial setup of email accounts with this state agency, and setup and maintenance of Email accounts at the PC Level.
-
